

(0-10) COUNT ON TO FIND THE DIFFERENCE

How can you do $5 - 4$?

One way is to take away 4 from 5.

Start with the bigger number 5 and count back 4 using the number line.

But adding is easier than taking away.

So you can also start with the smaller number 4 and count on to get to the bigger number 5.

Both answers are 1.

$$5 - 4 = \boxed{1}$$

$$4 + \boxed{1} = 5$$

(0-10) COUNT ON TO FIND THE DIFFERENCE

a) $8 - 6 = \square$

$6 + \square = 8$

b) $9 - 5 = \square$

$5 + \square = 9$

(0-10) COUNT ON TO FIND THE DIFFERENCE

Answers

a) $8 - 6 = \boxed{2}$

$6 + \boxed{2} = 8$

b) $9 - 5 = \boxed{4}$

$5 + \boxed{4} = 9$

(0-10) COUNT ON TO FIND THE DIFFERENCE

a) $10 - 7 = \square$

$7 + \square = 10$

b) $6 - 4 = \square$

$4 + \square = 6$

(0-10) COUNT ON TO FIND THE DIFFERENCE

Answers

a) $10 - 7 = \boxed{3}$

$7 + \boxed{3} = 10$

b) $6 - 4 = \boxed{2}$

$4 + \boxed{2} = 6$
