

FACTORS OF NUMBERS 1-10

- A factor is a whole number that divides into another number without any remainders
- We can use a factor tree to find out all the factors of a number
- For the number 4 we know that $1 \times 4 = 4$ and $2 \times 2 = 4$ which means 1, 2 and 4 are all factors of 4

Make a factor tree to find the factors of the following numbers
