

PIE CHART 1

- Data means all sorts of information for example names of fruits and numbers
- This data can be put into a pie chart
- A pie chart is a circle which is divided into sections to show the proportions of a data set
- The number in each section depends on what fraction of the circle the section is
- If the section is half of the circle (180°) it will contain half of the total number

Favourite fruit of children in Class 1

There are 20 children in Class 1

How many children liked oranges the best?

How many children liked apples the best?

How many more children liked bananas than apples?

Which is the favourite fruit?

How many children were asked about their favourite fruit?
