At the shop, ice pops cost 1p.

You want 10 ice pops.

How much money do you need?

There are 4 children sitting at the table.

The teacher gives them 1 pen each.

How many pens does the teacher give out altogether?

Each jelly costs 2p.

Sam wants 1 jelly.

How much money does Sam need?

At the shop, ice pops cost 1p.

You want 10 ice pops.

How much money do you need?

$$10 \times 1 = 10\text{p}$$

There are 4 children sitting at the table.

The teacher gives them 1 pen each.

How many pens does the teacher give out altogether?

$$4 \times 1 = 4 \text{ pens}$$

Each jelly costs 2p.

Sam wants 1 jelly.

How much money does Sam need?

$$2 \times 1 = 2\text{p}$$
